Oskar Braatens gate 9  
0474 Oslo

## WORK EXPERIENCE

### 2021 ● FULL STACK JAVASCRIPT DEVELOPER

School of Applied Technology

Highly paced and intense training program with a focus on JavaScript, Node, and React. I was handpicked to join the program with 25 other professionals from a pool of about 1200 applicants. The program includes: JavaScript, Node, React, HTML5, CSS3, MongoDB, TDD, Agile & Mob-programming. More information: <https://salt.dev/>

### 2018 ● ORDER FULFILLMENT COORDINATOR

Tesla Motors

Daily coordination of the inbound and outbound shipments related to Tesla Norway's third party logistics and warehouse provider Collicare Logistics. Following up on placed orders and escalating issues when needed. Sourcing parts for service centers. Daily creation of Excel spreadsheets containing orders to be processed. Managing the prioritization of parts distribution to the various service centers and bodyshops within Norway and internationally.

### 2017 ● ORDER ADMINISTRATOR

Tesla Motors

Handling and fulfilling part orders from the various service locations throughout Norway and internationally using Tesla's proprietary IT solution 'Warp'. Worked as part of a small team that served as a contact point between Tesla's service centers and their third party warehouse and logistics provider Collicare Logistics.

### 2015 ● SERVICE CONCIERGE

Tesla Motors

In this position I worked mainly at the front desk of the most busy and hectic Tesla service center in Norway - Tesla Oslo North. Tasks included meeting and greeting customers before service appointments, collecting customer complaints, setting up service appointments and consulting with service technicians. In addition to helping customers face-to-face in the reception area, customer service was also given over the phone and via email.

### 2014 ● IT SUPPORT SPECIALIST

Oslo Metropolitan University

Worked at the front line support at OsloMet resolving technical IT issues for clients and colleagues. Assisted clients by phone, email and face-to-face in the reception area.

“

Software developer located in Oslo. I like coding in Swift, JavaScript, React, React Native, Next.js and more! I write clean, readable and reusable code. Creative, self-driven and detail-oriented.
